Jaffar Shaikh

Senior Consultant @ EY | Client: Morgan Stanley | Ex-LTM | AI & Agentic AI Engineer | GenAI, RAG, LLMs & AI Agents | Full-Stack | Azure & AWS
Mumbai, Maharashtra, India

Summary

I’m a Senior Consultant & AI Engineer with 5+ years of experience building scalable full-stack applications, Generative AI solutions, and intelligent automation systems.My experience sits at the intersection of Full-Stack Engineering and AI, allowing me to build solutions end-to-end — from modern user interfaces and backend APIs to RAG pipelines, AI agents, LLM orchestration, and cloud deployment. Full-Stack Engineering: React.js, Next.js, TypeScript, Node.js, Express.js, Python, MongoDB & REST APIs Generative & Agentic AI: LLMs, LangChain, LangGraph, RAG, AI Agents, Prompt Engineering & Tool Calling Vector & Search: Pinecone, Milvus, Embeddings, Semantic Search & Retrieval Cloud & Deployment: Microsoft Azure, AWS, Docker & CI/CD AI Engineering: Building production-ready AI applications, workflow automation, API integrations & enterprise AI solutionsI enjoy solving complex engineering problems and transforming business requirements into scalable, production-ready applications and AI-powered solutions. My focus is not just on building AI prototypes, but on integrating AI into real-world enterprise systems where it can improve automation, productivity, and decision-making.I’m continuously strengthening my expertise in Agentic AI, Generative AI, System Design, DSA, and scalable application architecture, with a strong interest in working on technically challenging, high-impact products. Open to: Senior AI Engineer | Agentic AI Engineer | Generative AI Engineer | Full-Stack AI Engineer opportunities, particularly across Dubai, UAE & GCC. Let’s connect:Email: shaikhjaffar147@gmail.comContact : +918976412394Always happy to connect with engineers, AI professionals, recruiters, and technology leaders working on exciting AI and software engineering challenges.

Experience

EY

Senior Consultant AI Engineer

August 2026 - Present (4 months)

Mumbai, Maharashtra, India

* Build and deploy Generative AI, Agentic AI & RAG solutions.
* Develop AI agents and intelligent chatbots using Azure OpenAI, AI Foundry & Copilot Studio.
* Implement LLM integrations and RAG pipelines using LangChain & LangGraph.
* Develop scalable AI applications using Python, FastAPI, Node.js & TypeScript.
* Focus on production-ready, secure, and scalable AI solutions.

LTIMindtree

Senior Software Engineer

November 2024 - August 2026 (1 year 10 months)

Mumbai, Maharashtra, India

Architected enterprise-grade full-stack MERN solutions on Microsoft Power Platform, maintaining 99.9%
availability for 10,000+ global users.
Engineered AI-driven Microsoft Copilot agents, successfully automating workflows and reducing manual
task resolution time by 30%.
Spearheaded Power Automate workflow implementations, cutting operational overhead by 25% across
multiple business verticals.
Optimized backend RESTful services with Node.js and MongoDB, ensuring robust data validation and
seamless integration for mission-critical enterprise systems.
Managed end-to-end Azure cloud deployments and CI/CD pipelines, resulting in a 40% reduction in
production deployment incidents.
Enhanced system reliability by diagnosing complex production issues, achieving a 35% improvement in
MTTR through strategic code-level debugging.
Authored technical SOPs and comprehensive knowledge-base documentation, reducing new-hire
onboarding cycle times by 50%.

Presolv360

Frontend Developer
December 2023 - October 2024 (11 months)
Mumbai, Maharashtra, India

Led full-cycle frontend development for a corporate platform, accelerating project time-to-launch by 20%
through efficient cross-functional collaboration.
Developed a modular library of React 18 and TypeScript components, boosting application Web Vitals
(LCP, FID, CLS) scores by 25%.
Integrated 20+ secure RESTful API endpoints, strengthening data integrity and reducing user-reported
error rates by 40%.
Ensured 100% cross-browser and cross-device compatibility, expanding the platform's reach by 15%
across legacy systems.

1 Click Capital
Frontend Developer
July 2022 - October 2023 (1 year 4 months)
Mumbai, Maharashtra, India

•Worked as a front-end developer and involved in the analysis of requirements, the design and the integration of the Corporate website.
•Brief experience in implementing the GSAP in creating animations based on CSS classes.
•Managed website development from the initial stage to the completion stage.
•Implemented improvements in web responsiveness and functionality.
•Parsed JSON data from APIs into a format that can be easily used in the React.js components
•Updated UI elements, such as tables and lists, with the fetched data.
•Implemented error handling to ensure a smooth user experience, including network errors and API errors.
•Responsible for integrating APIs into the company's React.js web applications.

Nina Percept Pvt Ltd
Project Engineer
January 2022 - June 2022 (6 months)
Maharashtra, India

1.Cost estimation: Developing and maintaining detailed cost estimates for all aspects of a construction project, including materials, labor, and equipment.

2.Budget management: Monitoring project expenses and ensuring that costs are kept within the project budget.
3. Documentation: Maintaining accurate and up-to-date project documentation related to billing and cost control, including invoices, change orders, and receipts.

Education

Rizvi College of Engineering

Bachelor of Engineering - BE, Civil Engineering · (July 2016 - October 2020)

M.H. SABOO SIDDIK TECHNICAL HIGH SCHOOL AND JUNIOR COLLEGE

HSC, Mathematics and Computer Science · (July 2014 - May 2016)
